## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20 and 33-35, drawn to a method of making a medical balloon, classified in class 128, subclass 898.
- II. Claims 21-32 and 36, drawn to a medical balloon, classified in class 606, subclass 194.
- III. Claims 37 and 38, drawn to an apparatus for making a medical balloon, classified in class 451, subclass 398.

Inventions I and II are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make other and materially different product such as a medical balloon that does not have a T-shaped or V-shaped structure.

Inventions III and II are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case the apparatus as claimed can be

Art Unit: 3731

used for making a different product such as a medical balloon that does not have a T-shaped or V-shaped structure.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Group I is not required for Group II or III, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I : Figure 1.

Species II : Figure 2.

Species III : Figure 3.

Species IV : Figure 4.

Species V : Figure 5.

Species VI : Figure 6.

Species VII : Figure 7.

Species VIII : Figure 8.

Species IX : Figure 9.

Species X : Figure 10.

Species XI : Figure 11.

Species XII : Figure 12.

Species XIII : Figure 13.

Species XIV : Figure 14.

Species XV : Figure 15.

Art Unit: 3731

Species XVI : Figure 16.

Species XVII : Figure 17.

Species XVIII : Figure 18.

Species XIX : Figure 19.

Species XX : Figure 20.

Species XXI : Figures 21,22 and 23.

Species XXII : Figure 24.

Species XXIII : Figures 25 and 26.

Species XXIV : Figure 27.

Species XXV : Figure 28.

Species XXVI : Figure 29.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by

Art Unit: 3731

37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
